## JANUARY 1986

**PRESIDENT**  
Dr. Nelson W. Rupp  
9125 Levelle Dr.  
Chevy Chase, MD 20015  
(301) 921-3512

**PAST PRESIDENT**  
Dr. Ron K. Harris  
7018 Stewart Court  
Indianapolis, Indiana 46256

**PRESIDENT-ELECT**  
Dr. Julian J. Thomas  
Chairman, Operative Dentistry  
The Dental School  
Northwestern University  
240 E. Huron St.  
Chicago, IL 60611  
(312) 266-5976

**VICE-PRESIDENT**  
Dr. Allan Osborn  
Medical Arts Bldg.  
Suite 406  
Winnipeg, MB Canada  
R3C 3J5  
(204) 942-6830

**SECRETARY-TREASURER**  
Dr. Ralph A. Boelsche  
2514 Watts Road  
Houston, TX 77030  
(713) 664-3537

**EXECUTIVE COUNCIL**  
1986—Dr. Richard V. Tucker  
1987—Dr. William H. Harris  
1988—Dr. Michael A. Cochran

## The Thirty-Fifth Annual Meeting AMERICAN ACADEMY OF GOLD FOIL OPERATORS San Francisco, California

The Board of Directors of the American Academy of Gold Foil Operators met on October 30, 1985 at 1:00 p.m. in the Colombard Room of the Hotel Meridien, San Francisco, California.

The meeting was called to order by the president, Dr. Ronald K. Harris. Board members present were: Dr. Nelson W. Rupp, Dr. Julian J. Thomas, Dr. Allan Osborn, Dr. Richard V. Tucker, Dr. William H. Harris, and Dr. Ralph A. Boelsche. Others in attendance were Dr. William J. Roberts, immediate past president; Dr. James P. Verneti, Dr. Gerald Stibbs, Dr. Ian Hamilton, Dr. David Bales, Dr. Arthur Johnson, Dr. Bruce Smith, Dr. Robert Birtcil, Dr. Hugh McDonnell, Dr. Michael Cochran, Dr. Chester Gibson, and guest Dr. Gian Carlo Chiarini of Genova, Italy.

It was moved and approved that the minutes of the February Board meeting be accepted as published in the Gold Leaf. The financial statement was approved as read by the Treasurer.

Announcements were made relating to the functions of the meeting, the hospitality room, the tours, and transportation to and from the University of California San Francisco Dental School.

Dr. Julian Thomas reported on the clinical portion of the program. He informed the board of the difficulty in procuring permission from the California State Board of Examiners to have clinicians from all over the United States and Canada operate in the state of California.

Dr. Robert Birtcil, local arrangements chairman, was recognized by the president. Dr. Birtcil gave a detailed report on the legal problems involved in the presentation of a clinical program as held by the Academy. He asked that the board express a word of appreciation to Mr. Joe Cowan, the University legal council, for his untiring efforts in resolving this situation.

The board gave a special vote of tribute to Dr. Birtcil for his extreme effort in handling the clinic program.

Dr. Nelson W. Rupp reported that the lecture portion of the program was in order for Friday morning.

The following committee reports were read and approved: **Membership:** Dr. Arthur W. Johnson, chairman; **Public Relations:** Dr. Chester Gibson, chairman; **Literature and Research:** Dr. Michael Cochran; **Nominating:** Dr. Ian Hamilton, chairman; **Education:** Dr. Bruce Smith, chairman; **Distinguished member:** Dr. Gerald D. Stibbs, chairman.

Dr. Ian Hamilton gave the Journal report. He noted that a large number of articles and abstracts appearing in the Operative Journal have been reprinted in outstanding Dental publications around the world. He reported that the Journal is ten (10) years old and he would

be passing the editorship to Dr. David Bales. Dr. Hamilton made suggestions for changes to be considered in the size of the Corporation Board of the Journal. Discussion followed on how to best coordinate the by-laws of the American Academy of Gold Foil Operators and the Academy of Operative Dentistry in resolving this need. The motion was made and approved to have Dr. Ronald K. Harris work on the wording of the by-law change to be presented for consideration at the February Board meeting.

The board gave a vote of appreciation to retiring editor Dr. Hamilton and to incoming editor Dr. David Bales.

It was announced that future meetings would be 1986—University of Puerto Rico, San Juan; 1987—University of Colorado, Denver; and 1988—Georgetown University, Washington D.C.

### OLD BUSINESS

**Charles M. Stebner Instruments:** It was decided to leave the instruments in the hands of Northwestern University School of Dentistry for the coming year.

**Continuing Education Course on Direct Gold Restoration:** It was reported that the first course was conducted at Northwestern University June 10-14, 1985. Host coordinator was Dr. Julian Thomas, with instructors being Dr. James P. Verneti and Dr. Ronald K. Harris. This report was followed by a discussion relating to the further destiny of the program. Drs. Thomas, Verneti and Harris were highly praised for this successful effort and were asked to continue with future plans.

**The movie: "Direct Gold":** It was announced that the revised edition would be seen following the Friday morning lecture program. It was decided to place the responsibility of deciding how best to distribute the film to dental colleges in the hands of the Education Committee.

**Dental Insurance:** Dr. Ronald Harris read a proposed letter to Insurance companies urging their claims department to better understand and approve Gold Foil restoration claims for patients. The board encouraged continued effort in this area.

### NEW BUSINESS

The board approved the following suggestions:

The names of members wishing to serve the Academy in committee or office position be sent to the office of the Secretary-Treasurer to be passed on to the nominating committee.

That future chairmen of the clinical portion of the annual meeting keep in close working contact with the clinicians in making preparations for their participation.

That the Friday business session of the annual meeting be less rushed and more inclusive to better inform the general membership.

There being no further business the meeting was adjourned.

## **BUSINESS MEETINGS**

### **Thursday, October 31, 1985**

The meeting was called to order by the president, Dr. Ronald K. Harris.

Announcements were made.

The names of the new associate members were presented by the Membership Committee. They were approved as read.

The following slate of officers was read and approved by acclamation: President—Dr. Nelson W. Rupp; President-Elect—Dr. Julian J. Thomas; Vice President—Dr. Allan Osborn; Executive Council—Dr. Richard V. Tucker, Dr. William Harris, Dr. Michael Cochran.

The meeting was adjourned for the clinic at the University of California San Francisco.

### **Friday, November 1, 1985**

The meeting was called to order by Dr. Ronald K. Harris.

Dr. Gerald Stibbs and Dr. William Harris gave the critique of the

Thursday clinic. The membership was told of the increasing care that must be taken in the future to comply with each state board of dental examiners guidelines for operating in the clinics in that state.

Dr. Ronald Harris paid tribute to local arrangements chairman Dr. Robert Birtcil and expressed appreciation to Dr. John Greene, Dean, Dr. Malcolm Jendresen, and Dr. Ben Braly for the hospitality and work done by the dental college in San Francisco.

Dr. Julian Thomas gave the report on the Continuing Education Course on Gold Foil conducted at Northwestern University in June 1985.

Dr. James P. Verneti gave the Necrology Committee report. The names of Dr. John Ryan, died January 16, 1985, and Dr. Ralph Plummer, died May 11, 1985, were read and remembered with special remarks.

Dr. Harris gave the report on the work being done by the Academy relating to Insurance Companies and their benefits to the carrier for Gold Foil restorations.

Following the lecture portion of the program Mr. Vic Williams presented the revised edition of the Gold Foil movie. This was followed by a discussion on how best to distribute the film. A suggestion was made for alumnae to make presentations to their respected schools.

The meeting closed with a short message from the 1986 President Dr. Nelson W. Rupp entitled "The New Era."

The meeting was adjourned at 12:00 noon.

---

## **From the desk of the President**

Dear Fellow Academy Member:

This is being written as Helen and I are flying back to Maryland after a most exhilarating annual AAGFO meeting. One of the highlights of the meeting was the Distinguished Member recognition of Charlie Stebner for his continuing and inspiring leadership. What a truly remarkable and worthy person. Congratulations, Charlie!

The support by the University of California College of Dentistry at all levels was excellent and enthusiastic. Everyone, from Dean John C. Greene; the Restorative Department Chairman, Mal Jendresen; Operative Section, Ben Braly; to Bob Birtcil, the local arrangements chairman, gave unselfishly of his time, energy and talents. The patient selection, with a good choice of lesions, permitted the operators to demonstrate a variety of skills. The faculty, students and members of the Academy who were observing repeatedly remarked about the exceptionally fine quality of the restorations. We all learned many skills and tips on cavity design and preparation. Thank you, UCSF, the operators and assistants for a stimulating clinical session.

The essayists presented a series of papers designed to emphasize basic fundamentals with variations they have developed through years of experience. Their knowledge will make our direct gold restorations even better. Their skill in delivering that message is best exemplified by the sustained interest of all attendees and a full house four hours later at the close of the session. Thank you Marty Anderson, Richard Hoard, Jack Seymour and Chet Gibson for putting all that time, energy and talent into your preparation and presentation of the essays.

The new film on direct gold produced by Vic Williams has been revised since the presentation a year ago. This version will contribute significantly toward stimulating a revival of interest in the use of direct gold. This will be true especially in those schools where the emphasis on direct gold has been ignored. It is going to be up to us, each individual member, to see not only to the distribution of the film but to its repeated use in every dental school.

One of the many items discussed in the business meeting that deserves special recognition is the retirement of Dr. Ian Hamilton from his position as Editor of Operative Dentistry. Ian has brought that journal to maturity, and it is widely recognized and referenced because of its high quality. We hope you will continue to write your excellent editorials, Ian.

Dr. David Bales was appointed the new editor. Good luck, Dave.

We are already planning for the October 16-17, 1986 meeting in Puerto Rico. Letters from the faculty at the dental school have been most enthusiastic, indicating an eagerness to provide any required support. As these plans develop, we will be sending along the information so that you can make your plans to attend. Dr. Allan Osborn is in charge of the clinical session. Anyone interested in operating, please let Allan know your desires.

### **Request for Suggestions**

After another successful annual meeting, several members urged me to write while still basking in the warm glow of that session. Also, they suggested a poll or canvass of our membership for suggestions for future Academy action. In response to this idea, I invite you to give freely of your thoughts.

We who attended this year's meeting, approximately one-third of our membership, left with a positive, upbeat feeling. Even so, how can we increase attendance at the annual meeting so that more of our members can become similarly stimulated? Is the meeting place a problem? After Puerto Rico we will be meeting in Denver (1987) and Washington, DC (1988). With the ADA meeting in Honolulu in 1989, where should we meet that year? Seattle, Vancouver, Honolulu or \_\_\_\_\_?

One of the primary objectives of the Academy is to expand and invigorate study clubs, especially clinically active clubs. How is yours working? Do you have suggestions as to how others can be equally successful? Do you need help? Should we have a study club committee or directory? If you are in an area without a study club, can we help you to organize one or help find the closest one for you to join? Some of our members travel hundreds of miles for the clinical sessions.

What suggestions do you have to make the Academy even stronger?

What role could you plan in fulfilling our mission?

Please send your suggestions to the AAGFO office, 2514 Watts Road, Houston, Texas 77030 or to me as your President.

Most sincerely,  
Dr. Nelson W. Rupp

---

## President's Message

The American Academy of Gold Foil Operators is gradually growing into an international organization. This year we accepted applications from two dentists from Italy, and we have one other application pending. This brings to at least 14 the number of members from seven countries not within the Americas. This international growth is stressed because some individuals look on direct gold as gradually joining the buggy whip as an antique rather than a viable material. We in the Academy know that direct gold will continue to be used in the 21st century.

Each of us in the Academy has his own favorite response to the negative attitudes. To supplement and enforce our response, we now have access to a new and vibrant video tape or movie. Those of us at

the annual meeting were inspired by Vic William's recently completed movie. It is something each study club should have—not only to indoctrinate new members, but, more importantly, to carry our message to nonmember dentists, dental students and the public. In this way we can create a demand by those viewers who previously did not know the many advantages of direct gold restorations.

We need to have this film exposed to as wide an audience as possible. An avenue to increase this exposure would be to make certain that each dental school has either the video tape or the movie to be shown to both students and faculty. Let us all get on this gold rush.

## Our New Board of Directors

*Dr. Chester Gibson introduces the new Board of Directors: Dr. Nelson Rupp—President; President-Elect—Dr. Julian Thomas; Vice-President—Dr. Allan Osborn; Secretary-Treasurer—Dr. Ralph Boelsche, and Executive Councillors—Dr. Richard Tucker, Dr. William Harris and Dr. Michael Cochran.*

President Harris presents gavel to incoming President Woody Rupp.

Presentation of Past-President's plaque.

President Woody Rupp thanking Past-President Ron Harris.

Special guest speaker Professor Emeritus Dr. J. Rodney Matthews.

Dr. Jim Verneti introduces our Italian guests.

## Banquet Gathering

Dr. Greg Smith and Mr. Vic Williams being "convinced" by Dr. José Medina.

Drs. William Harris, Dick Tucker, Norman Ferguson and Bill Roberts.

The Dynamic Centre of the Academy, Dr. Ralph Boelsche and Mrs. Nell Faucett.

Dr. Pike and Dr. David Bales.

Dr. and Mrs. Birtcil enjoy the pre-banquet entertainment.

Dr. Mount from Adelaide, Australia.

Dr. Jim Guptill and Dr. Don Benson from Minnesota.

Recruiting new young blood into the Academy.

A naval encounter of the best kind.

## No Host Cocktail Hour

Dr. Jim Verneti with members of his Italian Study Club, guests of the Academy.

Dr. Boelsche and Dr. Eugene Merchant.

Dr. Mount with Dr. Woody Rupp.

Dr. Hugh McDonnell of Woodbury Study Club.

## Clinic Session

*The Clinic session was held at the University of San Francisco. Special thanks to Dr. Malcolm Jendresen, Dr. Ben Braly and Dr. Robert Birtcil.*

Dr. Dick Tucker Jr. seen condensing a Class III.

Dr. Frank Eggleston and Dr. Barry Evans looking worried.

Dr. Jerry Stibbs enjoying the clinic.

Dr. Ted Ramage assisted by Mrs. Ramage.

Dr. Charles Stebner discussing the finer points.

Dr. Allan Osborn with a Class IV in progress.

Dr. David Bales performs a Class II under the watchful eyes of Dr. Miles Markley and the camera.

Drs. Ralph Werner, Ralph Boelsche and Floyd Hamstrom.

Drs. Norman Ferguson, Ian Hamilton, and Ludlow Beamish.

Dr. Dick Tucker with assistance from Mrs. Tucker.

## Didactic Session

**Dr. Marty Anderson**  
**The Class II**  
**an Aristocratic Challenge**

Traced the designs and indications for various outline forms using a variety of models, dentoforms and clinical situations showing details of instrumentation and internal refinements and also detailing techniques to overcome unusual configurations of tissues.

Describing the packing in the manner of Dr. W. I. Ferrier, Dr. Marty Anderson went on to demonstrate the finishing techniques which included use of various rotary stones, discs, strips and finishing points including fine polishing diamond points. The paper was aptly illustrated with excellent slides of beautiful work.

**Dr. Richard Hoard**  
**A Symbiotic Arrangement**

Demonstrating the nature of the attachment zone within which we work, Dr. Hoard pinpointed the parameters that we must carefully observe to maintain a healthy tissue response to our operative procedures, utilizing some undergraduate procedures to reinforce the importance of paying very close attention to these parameters. In a series of beautifully prepared line drawings, the directions of individual groups of periodontal fibres were demonstrated and their clinical significance pinpointed. The overall picture was demonstrated in an excellent series of clinical situations showing consistently healthy tissues, whether they were delicate and friable or strong and normal.

**Dr. Jack Seymour  
Atypical Class III  
and Other Uses of Gold Foil**

Dr. Seymour challenged the Academy to think in terms of foil in all situations, and not just typical classical lesions. In masterly fashion Dr. Seymour showed how access could be readily gained for atypical approaches to foil, where otherwise gold might be precluded, and could be packed using a combination of hand-augmented malleting and McShirley electromallet with contra angle head. Along with, and fundamental to access, Dr. Seymour gave clear criteria for selection of separators suitable for use in individual cases. Many lesions were shown, which had dictated a given approach, by virtue of the position in which they presented. Dr. Seymour showed that design could readily be adapted to the most obtuse positions, and that finishing was equally facile regardless of design.

**Dr. Chester Gibson  
Incorporating Efficiency  
with Excellence in Direct Gold Fillings**

Made the following suggestions aided by first class illustrations:

1. Make your own dam napkins using outing flannel with an attractive pattern.
2. Hold the dam behind the distal anchor with a piece of the dam and remove the retractor for greater comfort to the patient.
3. Assistant should stand, rather than sit, while malleting for greater flexibility in following the positioning of the condenser.
4. Class III convenience point cut with a 33½ bur which has been modified to become just an end cutting bur.
5. Instruments for a Class V reduced to a minimum: a Jeffrey #103 straight chisel, small angle former and a 33½ inverted cone bur.
6. Abrasive disk already mounted on mandrels (easier to change mandrels than disks).

## 1985 Distinguished Member Award

**Dr. Charles Stebner**

The Distinguished Member Award was presented by Dr. Jim Verneti, who spoke of Dr. Stebner's long association with Gold Foil, and excellence in Dentistry.

Charles Stebner was the son of an immigrant coal miner, Bruno Stebner, who was, unfortunately, killed in a coal mine accident in Hanna, Wyoming, when Charlie was only five.

Mary Hughes Stebner, his remarkable mother, who had lost her

own father, and her husband, to mine accidents, was determined that Charlie would enter a profession to serve humanity, which he has done for over 50 years.

Charlie Stebner graduated from Creighton University School of Dentistry and started his practice in Laramie, Wyoming during 1932, the worst year of the great depression. He began his everlasting pursuit of post-graduate education by joining the Woodbury Study Club

of Omaha, Nebraska. Here he developed and enhanced his professional skills as well as acquiring a great interest in gold foil and rubber dam.

This training prepared him to become a widely known national and international lecturer and teacher in general and operative dentistry.

Few dentists have unselfishly given more of themselves to serve dentistry than has Charlie Stebner. He has lectured 43 of the United States and 7 foreign countries. Remember that this was in the days of no or minimal honorariums. He made nearly 200 separate appearances, often demonstrating practical chairside procedures thereby stimulating the formation of a half a dozen study clubs.

All this dental involvement has not prevented him, during his leisure time, from thoroughly enjoying and participating in his favourite sports of hunting, fishing, and camping. To this day Charlie continues to be an ardent outdoorsman.

Dr. Charles Stebner and his wife Mary.

He, also, was Laramie's first jogger, beginning some 20 years ago, and still going strong almost on a daily basis. He has written and lectured on the subject of physical conditioning and when he speaks to various groups, he says "by example I hope to encourage others to prevent premature heart attacks." We just admit that at 75 he does set a first rate example.

During World War II he volunteered for U.S. Navy duty and was assigned to Farragut, Idaho as a Lt. His service assignments included practicing operative dentistry, oral surgery, teaching corpsmen and junior dental officers, as well as conducting some bacteriologic research. This is not to say Charlie was an ideal dental officer because he set his own rules about quality instead of quantity dentistry along

with advocating the constant use of the rubber dam to the frustration of the commanding officers.

When challenged on the time utilized in placing gold foils during clinic time, Charlie would then do these procedures after regular working hours for anyone who requested treatment. As much of a rebel as he was, every commanding officer realized his value to the station and would reverse his sea duty orders so Charlie spent all the war years on the waters of Lake Farragut. The first time he put foot aboard a navy vessel was during a Coronado visit years after the war when Jim Verneti, an army man, arranged such a visit aboard an aircraft carrier for this frustrated sailor.

Charlie has promoted and continues to participate in many community endeavors. For his dedication he received the Lions Club's Laramie Distinguished Service Award. In dentistry his recognitions are too numerous to mention in their entirety. He has been awarded three fellowships—in the American College of Dentistry, in the International College of Dentistry and in the American Academy for the Advancement of Science. He is a past president of the Wyoming Dental Association and in 1983, at Cody, Wyoming, he received the honor of being the first dentist for whom a Wyoming State Meeting was dedicated.

In 1983 he was also chosen to participate in a Legends of Dentistry program at Northwestern University, and his Alma Mater presented him its 'Alumni Award of Merit' in 1967. Most know that Charlie Stebner is a past-president of this fine organization, but few remember that it was under his term as President-elect and program chairman that this Academy began its first operating session at Dade County Clinic in Miami, Florida.

The Stebners are proud parents of three fine children; sons Ronald, Kenneth and daughter Marilyn, a Wyoming Junior Miss of a few years ago. Quite a family—a Wyoming Mother of the year, a Wyoming Junior Miss, and Charlie Stebner, a dental and community achiever par excellence.

## Direct Gold in Zurich, Switzerland

During the month of September 1985, Drs. Lloyd Baum and Melvin Lund had the privilege of spending a week at the University of Zurich directing a seminar in operative and restorative dentistry. This was cooperatively arranged by Dr. Josef Schmidseider of Munich and by Dr. Peter Sharer of Zurich.

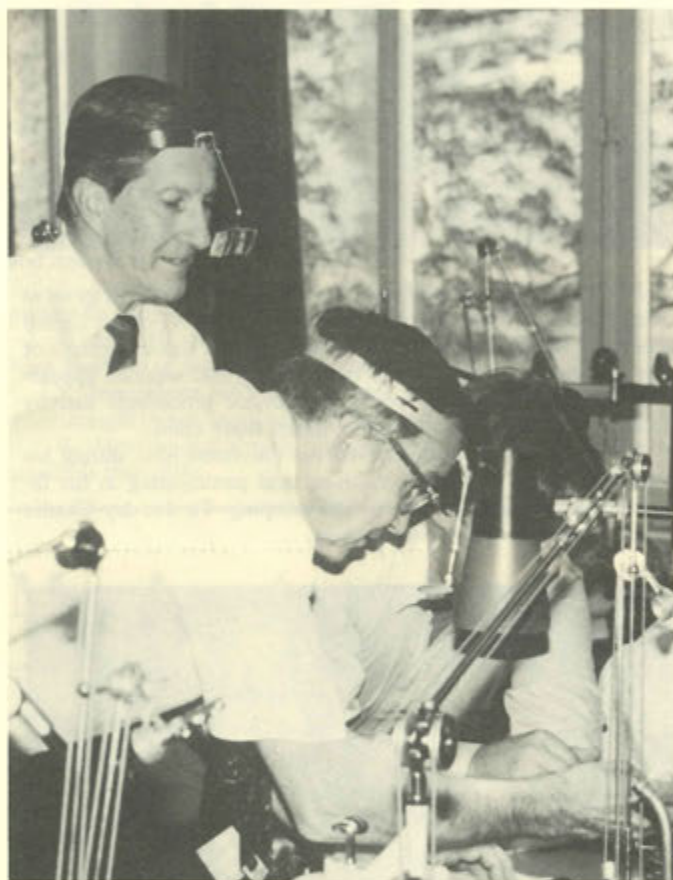

Dr. Baum and Dr. Lund teaching students in the Laboratory Project.

Dr. Lloyd Baum performing a Molar Class I for television and trying to avoid interfering with the camera.

Of the five days, three were devoted to a participation course in direct gold restorations. All of the participants were involved for a day with a laboratory exercise. Approximately 20 dentists were active each of these two days. This included direct microscopic evaluation of individual condensation techniques. It became apparent that personal effort has a great influence on the quality of results and consistency, as viewed by low power microscopy. In addition, each had the opportunity of condensing and finishing a class V restoration.

The last day was given to patient treatment, part of which was a T.V. demonstration and the remainder was treatment given by faculty members and residents from Dr. Sharer's Restorative Department.

Both Drs. Baum and Lund felt that the results obtained by each individual was very good. It also served to demonstrate that even though the background in direct gold, as possessed by most of these individuals was of a low order or non-existent, it was possible to demonstrate commendable levels of achievement within a very short time. This will allow these dentists to apply direct gold in a number of situations and to expect good clinical results.

## Williams' Gold Foil Movie

The Williams' Gold Foil movie, excellent at its first showing, has been improved greatly by using a wider cross section of commentators. This is a truly sophisticated presentation, beautifully produced, that should be in every school in N. America. May we suggest that everyone make it his or her business to be sure that their own Alma Mater both have and use a copy. The film traces the history of human fascination with gold through the process of refinement into fine gold and the rolling into sheets which can be beaten into gold foil for

clinical use. The formation of matte gold and the modern day electrolysis along with descriptions of their uses, is beautifully covered. The work of Dr. Lloyd Baum in the development of goldent and the manner of its working are similarly presented.

The commentaries at each and every stage, whether clinical, or introductory in some other phase, are always apropos and add to the impact of the film. Thank you Vic for your enthusiasm, dedication and hard work.

## Student Award

Dr. Robert Thye presented the American Academy of Gold Foil Operators award to William Dapper on May 23, 1985.

## Important Notice

Those members of the Academy who would like to operate at the upcoming meeting in Puerto Rico please contact me:

Dr. A. Osborn,  
Ste. 406-233 Kennedy Street  
Winnipeg, Manitoba, Canada R3C 3J5  
Phone (204) 942-6830

The following documentation was required from people not currently licenced in the U.S. to operate in California:

- (i) Current Certificate of Practice
- (ii) Original Diploma
- (iii) Evidence of Malpractice Insurance
- (iv) Curriculum Vitae
- (v) From Academics—a letter from the Dean signifying agreement to active clinical participation.

Please check the validity of your insurance and whether this covers you in Puerto Rico, and please inform me.

## Important Request

Due to the rushed schedule during our annual meeting, and the fact that we were dispersed all over San Francisco in a number of hotels, I missed getting back with some who still owe money to the Academy.

Please help me and the organization by taking care of your obligation without a special reminder.

Thank you.

Nell M. Faucett  
Administrative Asst.  
AAGFO Office  
2514 Watts Road  
Houston, Texas 77030

## Continuing Education Course on Direct Gold Restorations

The Continuing Education Course on Direct Gold Restorations sponsored by the Gold Foil Academy, Operative Academy, Williams Gold, American Dental, Hygenic and Suter was a resounding success. That course held at Northwestern University Dental School in June, 1985 was not able to meet the demand generated by its announcement.

In order to help satisfy the many requests for participation, it has been decided to hold a second course June 17-20, 1986, at Indiana University School of Dentistry. As before, it will be structured to include a clinical description of Class I and V direct gold restorative procedures, followed by performing these procedures on extracted teeth as well as restorations on clinical patients. At the completion of the course the participant will have completed four (4) Class I and V restorations on clinical patients as well as two (2) similar restorations on extracted teeth.

Selection of those to participate will be made on May 1, 1986. Selectees will be notified immediately and payment of the \$100.00 registration fee will reserve their place in the course. Those not selected will be given priority for a subsequent course.

Since this is a sponsored course, the cost to the participants would be subsidized. For this reason, the registration fee for members of the Academy of Gold Foil Operators, the Academy of Operative Dentistry or Operative Dentistry faculty in U.S. or Canadian Dental Schools will be \$100.00.

The registration will, of necessity, be restricted to eight (8) in order to provide a reasonable faculty-student ratio. Of course, all transportation, lodging, meals and incidental expenses will be the responsibility of the individual or their school.

Any member in good standing of The Academy of Operative Dentistry or The American Academy of Gold Foil Operators desiring to take this course should complete the application below and return it to:

Julian J. Thomas, Jr., D.D.S., M.S.D.
