AMERICAN ACADEMY OF GOLD FOIL OPERATORS

Annual Board Meeting

September 10, 1998

RADISSON METRODOME HOTEL - MINNEAPOLIS, MN.

Meeting was called to order at 2:05 PM by President Fred Eichmiller. Members present were: Drs. Bridgeman, Carlson, Harris, Johnson, R.D. Tucker, Keene, McCoy, Barrett, Lund, Verneti and Osborn.

The agenda for the meeting and interim financial report were distributed to all present. Minutes of the February Board meeting were approved as published in the Gold Leaf. The Secretary-Treasurer noted that money was taken from checking to bring one of the current CD's from \$20,000 to \$30,000. Membership has shown a decrease as of this meeting once again. It was agreed that the senior Board member, Dr. Keene, will perform a type of audit of account in Feb.

Treasurer's Report:

Assets — October 3, 1998:

CD	\$30,000.00	Matures 1/12/99
CD	25,000.00	Matures 12/13/98
Checking	<u>28,155.70</u>	
		\$83,155.70

(Interest is compounding on CD's vs. receiving monthly payment).

Receipts — 1998*	\$32,657.06	
Expenditures — 1998	<u>35,930.23</u>	
Net gain/loss		-\$3,273.17

*\$1,790 to be collected at meeting in addition.

Assets — January 1, 1998

CD	\$20,000.00	
CD	25,000.00	
Checking	<u>25,115.38</u>	
		\$70,115.38

Difference in Assets during 1998 +11,532.48

Dues + Journal Subscriptions* 14,553.00

Journal Subscriptions Paid 7,130.00

Dues Received — 1998 7,423.00

*Note: A large portion of dues payments was received in late 1997, as will occur in 1998.

Total members 310 (15 to be dropped and there are 8 new applicants, bringing total to 303)

Dues paying members — 206 (plus the 8 new members for next year)

Life Members = 86

Honorary = 3

Financial report was accepted.

Correspondence:

Contributions of \$200 to AFDH and the ADA Relief Fund were acknowledged. It was suggested that next year it go to the ADA Health Foundation vs. the AFDH.

NIDR letter requesting financial support. No action taken.

Letter from Dr. R.D. Tucker verifying audit of accounts in February 1998.

Letter of thanks from the Harris Museum in Baltimore for the Shooshan exhibit.

Journal Report:

Editor Dick McCoy reported that money is being saved by using the Allen Press located in Lawrence, Kansas. Manuscripts continue to be received at a steady rate, and waiting time for publication is now about 14 months. Number of pages have been increased to prevent delay in publication. Subscriptions and income are the best they have been for several years. Reprint requests continue to be strong. The Home Page for the Internet is still receiving a lot of hits.

Response to 1998 editorials has been very positive.

Dan Sneed will be chairman of the Supplement #6 committee, along with Ivan Stengel and Fred Eichmiller.

Faculty position ads, book reviews and "Operative Pearls" have been published.

Following a search for a new editor, the Board has agreed on Dr. Michael Cochran to assume full duties by 1 January 2000, with Dr. Tim Carlson as Managing Editor by February of 1999. Dr. McCoy will continue to publish accepted manuscripts in 1999 and assist in transition efforts. Subscription rates for 1999 will be \$60 for U.S. and \$70 for all other subscribers.

Annual Meeting Report:

Craig mentioned a minor change in Friday's schedule, but all is in order.

Tim said that the clinical session should be in good shape with 28 operations over two days. Patients have been secured from the Black study club, especially from Mark Modjean and Bruce Haasken.

Favors and table decorations have been made up by Mark Modjean's wife, Suzanne, and she is donating the table centerpieces at no cost to the Academy. She is to be congratulated for all of her (and his) hard work.

Future Meetings:

1999 — Meharry University in Nashville, TN October 27-30. Dr. Henry Young will be our guest at this meeting to see how things are done. We will plan to do two clinic days again.

2000 — Honolulu/Naval Dental Center Pearl Harbor November 1-4. Hotel to be selected in the next month. Interest seems to be very high.

2001 — Tentatively planned for Indianapolis. No firm dates yet.

2002 — Possibly Los Angeles/UCLA. No date yet.

Committee Reports:

Literature and Research — Fred Eichmiller presented his report. Bibliography is being updated with a number of new inserts. Could be published on a web site.

Nominating Committee — Jim Gourley will be the new Board member.

Inter-Academy Liaison — no report.

Public Relations — no report.

Education and Study Clubs — no report.

Necrology — There have been 4 decedents since last year's report: Drs. Paul Dawson, Cliff Miller, Paul Moore, and Collier Wheeler. Members are asked to keep the Secretary alerted on the death of any members.

Outstanding Clinician — The committee has selected Ralph Stenberg as this year's recipient, and Ric Hoard will make the presentation.

Distinguished Member — The awardee this year is Glenn Birkitt and Craig will make the presentation at the banquet.

Constitution and Bylaws — There has been no current activity during the year. Questions continue to be raised on the description of activities of some of the committees. There seems to be a need to get things more up-to-date. The ad hoc committee seemed to answer some of these questions by reducing the number of members on the various committees.

International Meetings — Allan and his group have set plans in motion for a meeting in Greifswald, Germany in early June of 1999. Dr. Georg Meyer has indicated a large degree of support, with possible funding available to defray costs.

Gold Leaf:

Allan Osborn said that there is a continued need for input from members, particularly from study clubs. There seems to be no problem at present.

Unfinished Business:

A contribution to Meharry of some sort will be pursued. We will try to look into areas of need by the school or the Operative department.

There is a possibility of funding a room at the University of Maryland National Dental Museum for a cost of \$10,000. Fred will look into this as a very meaningful project. It was suggested that our membership be polled for individual contributions, as many of the members might wish to support this. The Academy treasury is in shape to assist with this, if it appears worthwhile.

Discussion of a contribution to the Patty Medina Memorial Fund followed. It was agreed to do something.

New Business:

Dick Tucker would like to have names of those interested in operating in 1999.

The meeting was adjourned at 4:15 P.M.

Respectfully submitted,
Ronald K. Harris, D.D.S., M.S.D.
Secretary-Treasurer

President's Message

President
Dr. Craig Bridgeman

Greetings. I hope everyone enjoyed a wonderful Thanksgiving holiday. I'm still reeling from the terrific annual session that we enjoyed in Minneapolis. Many thanks to all who labored to make it so successful. Our appreciation goes out especially to our host school, the University of Minnesota School of Dentistry. As you know, the school was gracious enough to offer us two clinical sessions on consecutive days, allowing us for the first time in our academy's history to complete cast gold restorations start to finish. This was quite a treat for our members, and a formidable challenge for the operators who attempted castings (yours truly included!) The students showed genuine interest, and were most helpful as assistants.

I would also like to thank the members of the G.V. Black

Study Club for their assistance in the meeting. They are all to be commended on the celebration of their 100th anniversary. Our appreciation goes out to Mark Modjean, and Tony Romano for their hard work and organizational skills.

I am looking forward to serving as your president for the upcoming year. It is an honor to be selected to preside over such an august body as this academy. Often, incoming presidents approach their office with grandiose visions of sweeping change. I don't. This academy has functioned so well over the years, that I see little value in attempting to make substitutions into an already excellent recipe.

I would like to encourage you to go ahead and mark your calendars for next year's annual session to be held October 27-30, 1999, in Music City, USA - Nashville, Tennessee! Our host school will be Meherry University, and they are thrilled to have us come and share with their students. At the time of this writing, it looks as though we will once again enjoy the luxury of two clinical sessions, which will again permit castings. If you wish to operate, and have not yet so indicated, please contact Dick Tucker (Jr.) ASAP.

Elsewhere in this newsletter you will find a list of committee assignments for the coming year. Our committees have functioned well in recent years, so, again, I don't see a reason for sweeping change. However, I do think that it is important to recruit new blood into the committees to train future leaders for the academy. If you haven't served on a committee and would like to, just give me a call or drop me a line, and I'll do my best to put you to work.

In closing, let me remind you to plan to attend the Y2K meeting in Hawaii. The dates are November 1-4, 2000. Our tireless secretary-treasurer, Ron Harris, has obtained spectacular but reasonable accommodations. So start accumulating those frequent-flyer miles. Thank you again for your confidence. I look forward to serving you.

Craig Bridgeman

AMERICAN ACADEMY OF GOLD FOIL OPERATORS

Distinguished Member Award Presentation

Dr. Craig Bridgeman presents the Distinguished Member award to Dr. Glenn Birkitt.

meaningful than how to pick a partner on the golf course.

Our recipient of the Distinguished Member Award this year is Dr. Glenn Birkitt, of Leesburg, Virginia. Glenn was born in Berkley Springs, West (By Gosh) Virginia, and received his secondary education in Charles Town, West Virginia. Like many high school graduates, he didn't have a great sense of direction in his life, so he easily succumbed to the siren song of the U.S. Marine Corps recruiter. Isn't it amazing how our government always seems to provide simple

It was not often in a lifetime that one is given the opportunity to present such a prestigious award to a good friend. But, that is my pleasant assignment this evening. I have known and looked up to this individual for the entire twenty-two years that I have practiced dentistry. I have had the pleasure of watching him operate countless times, and also reaped the rewards of picking his brain within the serious clinical, and the casual, social settings of the study club environment. I've learned innumerable pearls from him, and only wish that I could have taught him something more

answers to life's most complex questions? And so, predictably, while dodging bullets on the hills of Korea, Glenn rapidly developed a sense of direction.

He returned to the States intact, and enrolled in pharmacy school at West Virginia University. During his tenure as a pharmacy student, Glenn met his future wife, JoAnn. They were married in 1956.

After graduation, Glenn worked as a pharmacist in Leesburg, Virginia. Now, Glenn has always been one who takes

Dr. Glenn Birkitt expresses his gratitude to the Academy.

advice seriously, so after hearing his minister admonish the congregation to spend their lives doing what they didn't like to do, he promptly applied, and was accepted into the fourth class at the new School of Dentistry at West Virginia University. His pharmacy degree afforded him the luxury of financing his dental education by selling drugs after clinical hours. In 1964, he graduated, and he and JoAnn returned to Leesburg to start a practice, and family. From that point until now, his life has been remarkably unremarkable.

Perhaps the greatest albatross in Glenn's life has been the fact that he was Bill Harris' classmate in dental school. The two became inseparable friends. After graduation, Bill was practicing in Beckley, West Virginia, and eventually found his way into the George M. Hollenback Operative Dentistry Seminar. Bill and Glenn always attended the football games at West Virginia University

together, which ultimately resulted in one of the great turning points in Glenn's life. In perhaps once of the greatest diplomatic coups of all times, Glenn agreed to join the study club, in exchange for Bill agreeing to stop lecturing about gold foil after the football games into the wee hours of the morning. The study club experience ultimately became one of the great loves of Glenn's life. He was able to find an avocation in the midst of his vocation.

for show – it's the same dentistry that he practices in his office every day.

Glenn's professional accomplishments are numerous. In addition to having served as president of our Academy, he has also served on the Executive Council of the Academy of Operative Dentistry. Her is a past-president of the George M. Hollenback Operative Dentistry Seminar, and is currently vice-president of that fun-loving group, the American Association of Dental Insultants. He is also active in his state and local dental societies, as well as past-president of the Leesburg Lions Club, and an Elder in the Presbyterian Church.

Glenn and JoAnn have five children. Their oldest daughter Jodi is in advertising design with a real estate publication in Charlottesville, Virginia. The oldest son, Glenn Jr., is a surgeon in Bristoll, Tennessee.

Their daughter Laura is an attorney, currently living with her husband in Johannesburg, South Africa. Their son Cary is a dental lab technician in Nashville, Tennessee, and Gus, the youngest, is currently in culinary school in Vermont. The Birkitts also have four grandsons.

Dr. and Mrs. Glenn Birkitt.

Glenn's full-time practice, and full-time family keep him extremely busy. Any spare time to be found is spent on his hobbies of golf, flying, and restoring old MGs.

Ladies and gentlemen, members of the Academy, it gives me great pleasure to bestow this year's Distinguished Member Award on a consummate person, an excellent dentist, a dear friend, and a pretty good gentleman farmer, Dr. Glenn Birkitt.

Craig Bridgeman

DIDACTIC SESSION

The G.V. Black Study Club of Minneapolis 1898-1998

A HISTORY BY DR. ANTHONY ROMANO
PINE CITY, MINNESOTA

Dr. Romano presented a highly stimulating and beautifully ordered paper concerning the history of the G.V. Black Study Club. The material for the history was garnered from old programs, photographs, documents and correspondence, and gave a thorough insight into this century old study club that has given so much to the profession.

Dean Michael Till graciously welcomes American Academy of Gold Foil Operators to the University of Minneapolis and extends an invitation to return.

In 1906 Dr. Conzett with the help of Dr. Wedelstaedt founded the Woodbury Study Club of Nebraska, many of whose members have been well known to this Academy. Visiting clinicians to the Study Club were Dr. Wedelstaedt and Dr. A.C. Searle.

Dr. Harry True, a member of the Woodbury Club, designed an inconspicuous class 3 preparation. Dr. True moved to San Francisco to teach at the College of Physicians and Surgeons that later became the University of the Pacific School of Dentistry.

Dr. Herbert Coy, who hailed from Western Iowa, another Woodbury Study Club member went to teach at the Medical College of Virginia, and influenced Dr. José Medina who was teaching at the Baltimore College of Dental Surgery.

Dr. Craig Bridgeman introduces the speakers.

Much material was gleaned from Dr. Conzett's writing in the ADA Journal (1936), also from Dr. E.R. Hilton writing in the Northwest and Minnesota Dental Journal. Dr. Eugene Merchant - well known to the Academy - and later Dean at Nebraska made significant contributions.

Following the epoch making publications in The Dental Cosmos in 1891 by Dr. G.V. Black, Dr. Wedelstaedt began travelling to Jacksonville, Illinois, to study with Dr. Black. It was at the latter's suggestion that Dr. Wedelstaedt returned to St. Paul in 1898 to found the G.V. Black Study Club.

In 1906 Dr. Conzett with the help of Dr. Wedelstaedt founded the Woodbury Study Club of Nebraska, many of whose members have been well known to this Academy. Visiting clinicians to the Study Club were Dr. Wedelstaedt and Dr. A.C. Searle.

Dr. Harry True, a member of the Woodbury Club, designed an inconspicuous class 3 preparation. Dr. True moved to San Francisco to teach at the College of Physicians and Surgeons that later became the University of the Pacific School of Dentistry.

Dr. Herbert Coy, who hailed from Western Iowa, another Woodbury Study Club member went to teach at the Medical College of Virginia, and influenced Dr. José Medina who was teaching at the Baltimore College of Dental Surgery.

Dr. Eugene Merchant stated that Drs. Wedelstaedt & Searle made annual visits to the Northwest, and influenced the teachings of Dr. Carl Oman, and Dean Ernest Jones of the University of Washington.

Some of the history of the club comes directly from the handwritten notes of Dr. Wedelstaedt, which were

Dr. Anthony Romano.

passed to Dr. Ben Wribinsky, thence to Dr. Perry Dungey, on to Dr. James Guptill and finally to Dr. Anthony Romano. Dr. Wedelstaedt speaks of a feud in 1896 between himself and the founding Dean Dr. T.E. Weeks at the School of Dentistry at the University of Minnesota, which was founded at almost the same time as the G.V. Black Study Club. This feud went on for some time and may have been rooted in some criticism that Dr. Wedelstaedt had passed previously on some preparations that were presented to him. Eventually, after Dr. Wedelstaedt had attempted to resign on several occasions from the Study Club, and did not attend the November 1902 meeting, the G.V. Black Study Club was, on December 8th, 1902, officially incorporated. Those who had been in opposition formed the Twin Cities Academy of Dental Sciences, which soon "went the way of a rudderless ship without a Captain".

Postgraduate clinics were given with great frequency. In February 1898 some 70-80 dentists assembled for instruction by Dr. Wedelstaedt. In 1899 Dr. G.V. Black gave a clinic with Drs. Johnson, Cattell, Weeks and Wedelstaedt as Assistants.

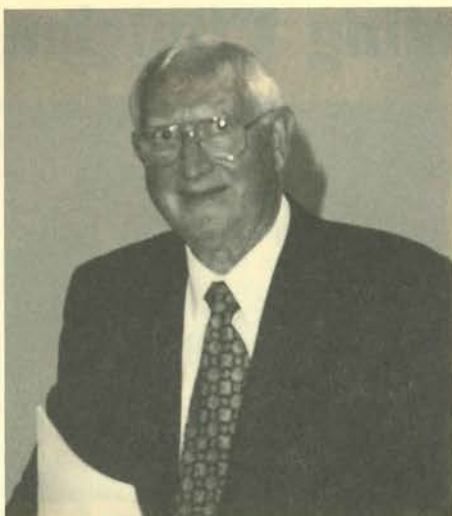

Dr. Alfred Owrie succeeded to the Deanship and was a well regarded and beloved Dean. In 1910 he contributed a chapter to Dr. C.N. Johnson's text on Operative Dentistry. He had also been active in the Annual Clinics which G.V. Black headed up each February. (Until at least 1911. He died in 1915.) The meeting encompassed a great deal. Dr. Black had begun the study of amalgam in 1893, and this along with cast gold, porcelain crowns and inlays, surgical demonstrations formed the backbone of what must have been exciting meetings. The presence of Dr. A.R. Black was also noted on the 1911 program.

Following the death of Dr. Black in 1915 Dr. Wedelstaedt continued to spread the word, travelling to his Alma Mater Harvard, to Ohio to the National Dental Association meeting (forerunner of the A.D.A.), New York, and Rhode Island.

Following the demise of Dr. Wedelstaedt in 1930 the two sons of Dr. Searle, namely Clarence and Sewell Searle, took over the mentoring of the G.V. Black Study Club.

Having met for the previous 33 years in the offices of Dr. Wedelstaedt it was at this time that operations were moved, with the assistance of Drs. B.K. Braun and James Jensen, to the University of Minnesota School of Dentistry, further cementing the close relationship between the two bodies; then in the 1940's Dr. John W. Olson took over the reins of leadership and the molding of the career of Dr. Anthony Romano who later became Chairman of Restorative Dentistry at the University. In recent times the Mentoring Mantel has rested upon the able shoulders of Dr. Gary L. Hill whose mentor's include Dr. Bruce Smith, the Academy's first President and Founding Father. Likewise Dr. Tom Larson has been an active and ever helpful figure in the club. Dr. Romano concluded his address by thanking Club President Dr. Mark Modjean for the enormous amount of work and dedication that he put in to ensure that we would have a truly memorable meeting.

***Dr. Richard
V. Tucker***

Demonstrated his superb cast gold technique and philosophy in a concise and rational manner that was particularly aimed at the younger members of the audience that they might have a better appreciation of the ultimate in professional service, and the pathway that they could choose that would enable them to achieve the high standards of excellence that lead to a highly satisfying professional life.

Dr. Tucker spoke to the need to avoid staining, and the manner in which the gold and the enamel meld together to be mutually supportive. He stressed the importance of the correct contours, and the avoidance of point contacts which will fail to achieve the objectives that are required of them.

In looking at the instruments that we use to refine the preparations it was noted that it is particularly important to avoid the temptation to do more with the hand instruments than to refine. The power preparation should substantially complete the desired shape prior to the use of hand instruments. The contribution by Dr. José Medina of the 42S & 43S, and other offset chisels, were praised for their ability to help refine the walls of inlay preparations.

The laboratory phase of the work is all important, and to this end a description of those factors which influence the expansion of the materials was detailed. Water powder ratios are critical, and those that are in use in Dr. Tucker's office were outlined as follows: for small occlusals and full crowns 15/50, for MOD, MODBL castings 18/50, for long castings, 3/4's 7/8s 18.5/50. A low expansion stone investment is the basis upon which a good casting can be waxed, and the nature and use of blind vents, where indicated, the control of oven temperatures and rates of rise were all discussed. Before continuing on to a discussion of finishing techniques he stressed the importance of neither overheating the gold nor overwinding the casting machine (2x) for either can result in the formation of fins.

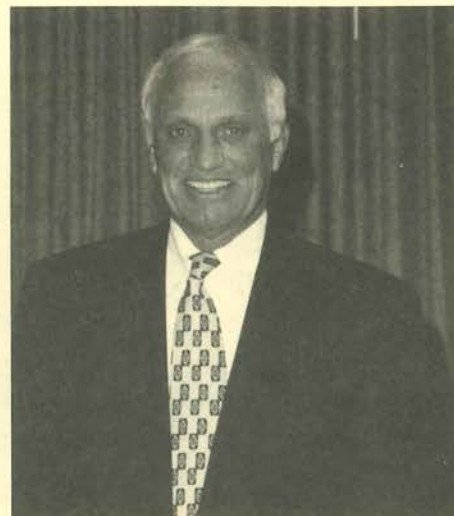

Dr. Michael Cochran gave critique of the clinical operations at the Didactic Session.

Dr. Mark Modjean, President of the G.V. Black Study Club.

***Dr. Reuben
Roach***

Defined the manner in which the Dental Profession operates as that of a Stomatognathic treatment organiser. Having laid the philosophical basis upon which his essay would be founded, he continued by describing the effects through time of the various factors that influence the wear that we observe upon the teeth and the system as a whole. Particular note was made of the effects of abrasion and erosion, and modalities through which they may occur, also of congenital disturbances and abnormal attrition. Acid damage through citrics, gastric juices, carbonated beverages, swishing habits, milling habits, and above all the exaggerated effects seen in alcoholics where they may be as much as 31x higher pattern of erosion.

Normal wear is hard to define, but appears to be in the region of 29 microns per annum in the molar region, and around 15 microns in the premolar region. The path to wear was defined as occurring to a large degree through clenching, bruxing and other oral habits; it was noted that nocturnal bruxism could produce pressures some 3x greater than daytime pressures, reaching as much as 950-1000 lbs/sq inch.

In dealing with the Occlusion it was noted that unstable occlusion leads to wear, mobility and migration. Excessive mobility leads to hypersensitivity, excess wear, muscular imbalance, T.M.D., Periodontal breakdown, and split of fractured teeth.

A short description of the physiology of inflammation followed, leading to a discussion of the vertical jaw relationship and the factors that give us stability in the different types of occlusion that we meet in everyday practice.

The essay concluded by looking at those factors that must be considered to produce an aesthetic outcome in either narrow or extensive treatment situations, and the means that we have at our disposal to preserve and communicate incisal position and palatal contours to the laboratory.

President Dr. Fred Eichmiller thanks Dean Tills for his hospitality.

Victor Williams Outstanding Clinician Award
